Plant Native Milkweed!

[Milkweed chart credit: [Rebecca McMackin](#) "In the US, lots of people plant the middle plant, *Asclepias curassavica*. It's tropical and can encourage the spread of diseases to monarchs. But it's WONDERFUL in its native range, from Mexico, south. Here is an article from Xerces Society on tropical milkweed outside of its range: <https://xerces.org/blog/tropical-milkweed-a-no-grow>"]
